Figure 1 consists of 15 bar charts arranged in a grid. Each chart represents a different variable, and the x-axis for each chart shows four categories: All respondents, Nonusers, Users, and Users who have used the service for more than 1 year. The y-axis represents the percentage of respondents, ranging from 0 to 100. The variables are: age, gender, education, income, marital status, number of children, number of vehicles, number of trips, number of trips per week, number of trips per month, number of trips per year, number of trips per day, number of trips per week, number of trips per month, number of trips per year, and number of trips per day. The charts show that users generally have higher values for most variables compared to nonusers, and that users who have used the service for more than 1 year have the highest values for most variables.
